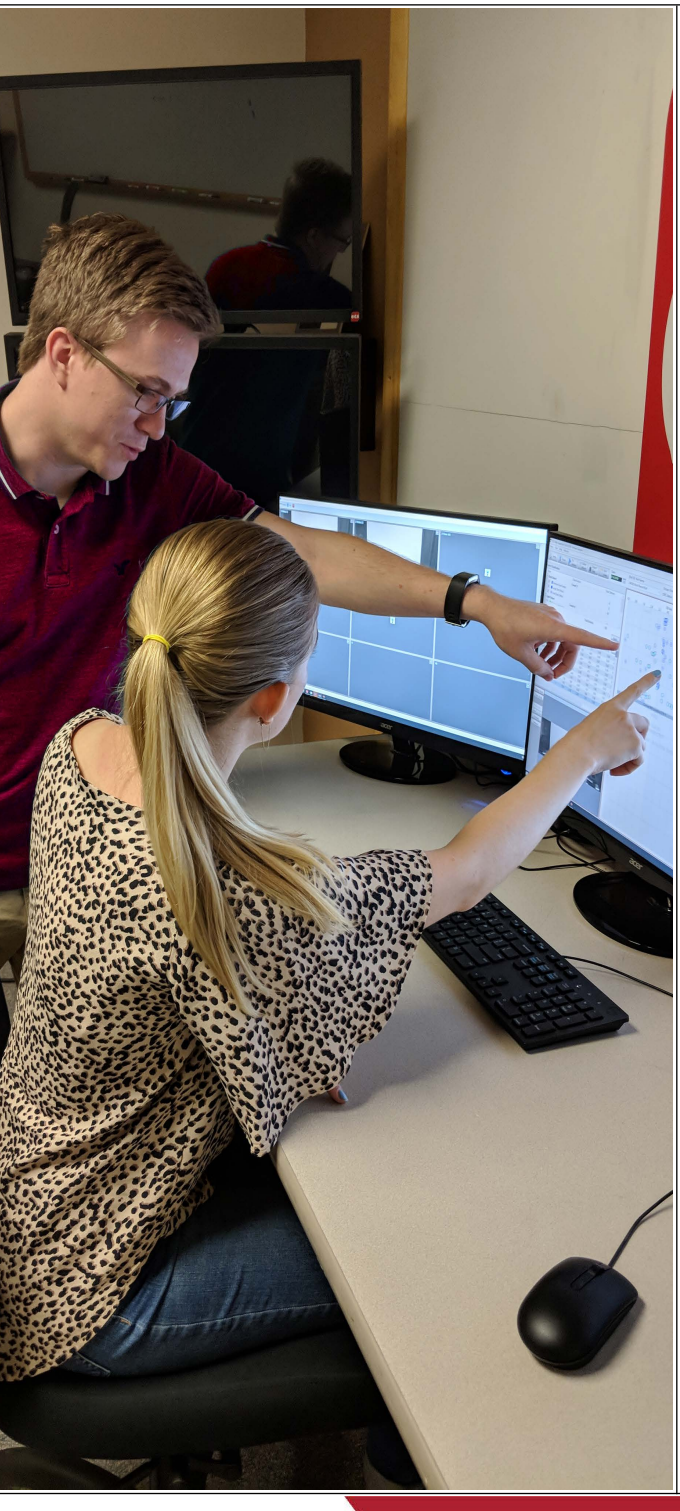
TRAINING

Expert Level Classes



No one has the ability to train you better than ECS. Expert level courses at ECS for 1-on-1 or group instruction.

Next training class is February 19-21, 2019

- Purpose-built training facility at ECS headquarters in Charlotte, NC
- Custom-designed training programs for mill teams
- Advanced training classes can be scheduled during system's Factory Acceptance Test (FAT)
- Focused, in-depth sessions on:
  - Field component optimization
  - Advanced trouble shooting and maintenance
  - System architecture
  - System settings and operator interface

For more info about Training...

Go online at www.ecsuptime.com/advanced-training

Call our Service Manager, Robert Cornette, at 704-519-5053

Custom mill specific training can also be scheduled for Spring 2019

The operators and technology will change; the installation of a camera based quality control and troubleshooting solution remains. ECS Expert Training ensures the investment in this technology continues to generate the maximum return on investment for the life of the system.

ECS IQ™

Process Monitoring | Event Capture | Web Inspection | Roll Intelligence Mapping | Mobile Solutions | Service & Support

We are a software company that designs, builds and installs camera based quality controls systems to increase process OEE (overall equipment efficiency). Event Capture Systems, Inc. is the leading manufacturer of video event capture software solutions for the paper, packaging and related converting industries.
