

TRAINING

No one has the ability to train you better than ECS. Expert level courses at ECS are great for 1-on-1 or group instruction.

- ▶ Purpose-built training facility at ECS headquarters in Charlotte, NC
- ▶ Custom-designed training programs for mill teams
- ▶ Advanced training classes can be scheduled during system's Factory Acceptance Test (FAT)
- ▶ Focused, in-depth sessions on:

- Field component optimization
- Advanced troubleshooting and maintenance
- System architecture
- System settings and operator interface
- The latest in ECS software releases

For more info about Advanced Training...

Call our Service Manager at (704) 519-5053

Custom mill specific training can also be scheduled for 2021

The operators and technology will change — the installation of a camera based quality control and troubleshooting solution remains. ECS Expert Training ensures the investment in this technology continues to generate the maximum ROI for the lifespan of the system.
